*1 From size 35 there are two different LEUCHTIE models to choose from: The battery powered LEUCHTIE Plus and the USB rechargeable LEUCHTIE Easy Charge.

*2 The LEUCHTIE size corresponds to the closely measured head circumference of the dog at the widest part, just in front of the ears.

*3 The luminosity of the different colours varies. The following are perceived as brightest: 1. green in a transparent tube (extra bright), 2. turquoise, 3. white, 4. lavender in a transparent tube, 5. ice blue.

*4 The colour green in a transparent tube (extra bright) provides approx. 120 h burn time per charge. All other colours at least 25 h.

*5 The LEUCHTIE Senior Edition was developed especially for visually handicapped / older / insecure dogs. With two LEDs directed to the front of the path, it can offer the dog increased safety in the dark.
